13:00  Coffee and Tea

13:20  Welcome

13:30  "Venus and Earth: Divergent Paths in Planetary Evolution"
      Lori Glaze (Planetary Geodynamics Laboratory)

13:50  "Measuring the Habitability of Mars with Mars Science Laboratory"
      Pamela Conrad (Planetary Environments Laboratory)

14:10  "Analogs to Trojan asteroids in binary black hole systems"
      Jeremy Schnittman (Gravitational Astrophysics Laboratory)

14:30  Break for Refreshments and Poster Session

15:00  "Multimessenger Galactic Cosmic Ray Astrophysics"
      Terri Brandt (Astroparticle Physics Laboratory)

15:20  “Saturn’s Equatorial Oscillation: An Earth Analog?”
      Mike Flasar (Planetary Systems Laboratory)

15:40  “Probing the Intergalactic Magnetic Field Through Searches for
      Gamma-ray Halos”
      Toni Venters (Astroparticle Physics Laboratory)

16:00  Adjourn for Refreshments
